

**AMENDMENTS TO THE CLAIMS**

1-26. (Cancelled)

26. (Currently Amended) A method in a computerized system of providing one or more personal use items for expected use by a user to one or more destinations to which the user intends to travel, the personal use items being provided by a plurality of suppliers able to deliver the personal use items to the destination within a time frame set by the user, the method comprising the steps of:

describing in at least one databases accessible via a network, each of the plurality of destinations to which the user can travel, each of the plurality of participating suppliers at each of said destinations, and personal use items offered by said suppliers at each of said destinations;

selecting a destination, personal use items, and a user's time frame;

generating at least one list of said selected personal use items picked from the plurality of items according to user's preferences, said user's time frame, availability of said personal use items, and ability of a supplier to deliver said personal use items to said destination within said user's time frame; and

said suppliers providing said personal use items to the destination within said user's time frame.

27. (Previously Presented) A method as in Claim 26, wherein said database further includes a description of destinations previously visited by said user.

28. (Previously Presented) A method as in Claim 26, wherein said database further includes a history of items previously requested by said user.

29. (Previously Presented) A method as in Claim 26, wherein said database further includes personal data of a clothing size, a height, and a weight of said user.

30. (Previously Presented) A method as in Claim 26, wherein said preferences includes preferred activities and preferred colors of the user.

31. (Withdrawn) A method as in Claim 28, wherein said generated list includes a list of available items corresponding to said selected items.

32. (Previously Presented) A method as in Claim 26, further comprising determining a fee for providing said items to the user at the destination.

33. (Previously Presented) A method as in Claim 32, wherein said fee is determined by at least one server computing device used to manage said database.

34. (Previously Presented) A method as in Claim 26, wherein said provided items are sold, leased, rented, loaned, and provided free to the user.

35. (Previously Presented) A method as in Claim 26, further comprising a step of generating a user profile from the a database information corresponding to said user upon said user performing said selecting step.

36. (Previously Presented) A method as in Claim 26, wherein said time frame indicates when said user will arrive at said destination and when said user will depart said destination.

37. (Previously Presented) A method as in Claim 26, wherein said time frame indicates when said items are to be provided at said destination.

38. (Previously Presented) A method as in Claim 36, further comprising a step of forwarding said time frame to said supplier, said supplier providing said selected items at said destination within said time frame.

39. (Previously Presented) A method as in Claim 37, further comprising a step of

forwarding said time frame to said supplier, said supplier providing said selected items at said destination within said time frame.

40. (Withdrawn) A product of manufacture comprising a computer-readable medium, said computer readable medium comprising computer-readable program code, said computer readable-program code for performing the following:

receiving a request from said traveler for said service, said request including at least one desired destination;

accessing at least one traveler database record corresponding to said traveler, said traveler database record including at least one of a plurality of personal data corresponding to said traveler and a plurality of preferences elected by said traveler;

querying said traveler database record for said traveler's personal data and said preferences, querying a location database record for data corresponding to said desired destination, and querying an item database record and a supplier database record for items available for provision at said desired destination;

generating at least one list of items available for provision at said desired destination, said list comprising at least one of a list of all available items, and a list of available items corresponding to at least one of said personal data, said preferences, and said location database record;

receiving a selection of at least one of said listed available items from said traveler, said selection indicating available items to be provided at said desired destination; and

forwarding said selection to at least one supplier, said supplier providing said items at said desired location.

41. (Withdrawn) A product of manufacture as in Claim 40, wherein said traveler database record further includes a plurality of destinations previously visited by said traveler.

42. (Withdrawn) A product of manufacture as in Claim 40, wherein said traveler database record further includes a plurality of items previously requested by said traveler.

43. (Withdrawn) A product of manufacture as in Claim 40, wherein said personal data includes at least one of a clothing size, a height, and a weight of said traveler.

44. (Withdrawn) A product of manufacture as in Claim 40, wherein said preferences includes at least one of a preferred activity and a preferred color.

45. (Withdrawn) A product of manufacture as in Claim 43, wherein said generated list includes a list of available items corresponding to said previously requested items.

46. (Withdrawn) A product of manufacture as in Claim 40, further comprising computer-readable program code for determining a fee for providing said items at said desired location.

47. (Withdrawn) A product of manufacture as in Claim 40, wherein said provided items are sold, leased, rented, loaned, or given to said traveler.

48. (Withdrawn) A product of manufacture as in Claim 40 further comprising computer-readable program code for generating a traveler database record corresponding to said traveler, said traveler database record being generated upon said traveler's first request for said service.

49. (Withdrawn) A product of manufacture as in Claim 40, wherein said request includes a time frame, said time frame indicating when said traveler requests said item to be provided at said desired destination.

50. (Withdrawn) A product of manufacture as in Claim 51, further comprising computer-readable program code for forwarding said time frame to said supplier.

51. (Withdrawn) The method as in Claim 26, wherein said items are selected from a group of objects normally packed in a traveler's luggage.

52. (Withdrawn) The method as in Claim 26, wherein said supplier retrieves said items from the user's home and provides said retrieved items to said destination.

53. (Previously Presented) The method as in Claim 26, wherein said network is selected from one of the Internet, wireless, or telephone.

54. (Previously Presented) The method as in Claim 53, wherein said selecting step is performed on an interactive world wide web based service, where a history for each user is maintained and interactive selection of desired items to be rented, purchased, and delivered to the destination is performed.

55. (Previously Presented) The method as in Claim 26, further comprising a step of selecting preferences including styles and colors of the items.

56. (Withdrawn) The method as in Claim 26, further comprising the steps of:  
determining health and handicap status of said user; and  
providing special items necessary to said user as a consequence of said health and handicap.

57. (Previously Presented) The method as in Claim 26, further comprising a step of labeling and packing the chosen items.

58. (Previously Presented) The method as in Claim 26, further comprising a step of discounting travel service to promote providing said items to said destination.

59. (Previously Presented) The method as in Claim 26, further comprising a step of packing said items in luggage.

60. (Withdrawn) The method as in Claim 26, further comprising the steps of:  
determining a geographic area of the destination, a pattern of a climate at said geographic

area, and expected weather during said time frame; and

suggesting based on said determination, items that will be necessary to the user as a consequence of said climate in said geographic during said time frame.

61. (Previously Presented) The method as in Claim 26, wherein said suppliers providing step further comprises notifying said suppliers of a change in the user's destination; and providing said items to said changed destination.

62. (Previously Presented) The method as in Claim 26, wherein said suppliers' providing step further comprises notifying said suppliers of a change in the user's time frame; and providing said items within said time frame.
